Done

Let me know when the shotcrete operation will begin so that I can be on site.

Christoph

As summary, my understanding is the following:

1. HW (Bob) will get the shotcrete mix design to Christoph (Deere and Ault). This mix shall specify whatever HW is recommending, including the accelerant additive if that is in fact what HW recommends for the portal shotcrete.
2. Christoph will then review / approve / comment on the mix design.
3. The shotcrete mix design is to be provided today and execute an order as soon as possible to allow the shotcrete work to proceed. If there is a problem, please inform Matt today.

Thank you,

Steve

There seems to be some delay in getting the shotcrete spec finalized and approved. EPA/ER being in the middle of these discussions doesn't seem to be the most efficient means of resolving. This needs to be resolved today to match the significant progress being made on site by the work crew. Please communicate directly and respond with the results.
